

What Our Clients Say

“ I have been using Nuovo’s Manual Egg Tray Stampers since May 2020 which had helped me to develop BAHUBOLI egg brand by leaps and bounds in the region. I have never imagined it to be so cost efficient. The imprint quality is fabulous due to its latest screen print technology and use of natural rubber in stamp membrane. Moreover the professional guidance offered by their India Distributor Mr. Shisher Tandon of Safety Concepts has been great and I wish them all the best for future as I plan to procure automatic egg printing machines from them soon “

“ We developed a great association with Safety Concepts and their dedication to our business interests was evident in the first ever interaction with them. We bought a Egg Grading cum Candling Machine of ZENYER brand and its performance has been very satisfactory. They also supplied us NUOVO manual egg stamps later which we found more than our expectations. Their attention to the details is praiseworthy and we all at EGGEE wish them all the best for future “

“Everyday I am stamping thousands of eggs produced in my farm. Impressed by the demonstration on NUOVO website I contacted them who promptly asked me to get in touch with their India Distributor Safety Concepts in Delhi. I placed the order with them and found the stamping quality of NUOVO manual egg stamps far much superior than my imagination and dedicated efficient services of their India representative. Later I had I also procured egg PET pack trays from them. Their after sales assistance in getting FDA certified Food Grade Stamping Ink was another plus point. Now I do not have to search for egg stamping needs. “

“ I am very pleased with NUOVO manual egg stamps. When I ordered first one, I was slightly on back foot but on seeing fine imprint quality I ordered multiple units for my other egg quality brand. I found it to be far much more than my expectations and much better than I have seen on some commercial eggs which is impossible to interpret. Thank you Safety Concepts. I will surely recommend to egg producers. ”
